

summer  
schools  
in applied  
molecular  
microbiology

Applications are invited from scientists at post-graduate and early post-doctoral level for the 2008 Summer School, entitled:

## MICROBIAL SECONDARY METABOLITES: Genomes, Signals and Communities

to be held at the  
**Inter-University Centre (IUC), Dubrovnik, Croatia**  
August 24 - September 1 2008

### topics

- isolation and screening of secondary metabolite-producing microorganisms
- secondary metabolites in microbial communities and cell-cell interactions
- regulation of secondary metabolism and intracellular signalling
- metagenomics and heterologous pathway expression
- genome sequencing, annotation and comparative genomics
- characterisation of biosynthetic pathways in silico and experimentally
- pathway engineering and combinatorial biosynthesis

### co-directors

David Hopwood, John Innes Centre, Norwich, UK  
Julian Davies, University of British Columbia, Vancouver, Canada

### local organiser

Duška Vujaklija, Ruđer Bošković Institute, Zagreb, Croatia
